

Thank you for your interest in taking this survey! Before we get started, we would like to share some information about this research study with you.

ABOUT THIS STUDY

This survey is being conducted by researchers at Virginia Tech, with funding from the Association of Fish and Wildlife Agencies (AFWA) and individual fish and wildlife agencies across the United States. **The goal of this research is to learn about the activities, experiences, and preferences of people who recreationally participate in wildlife viewing**, which includes observing, photographing, or feeding wildlife; improving or maintaining wildlife habitat; or visiting parks and natural areas for the primary purpose of wildlife viewing.

This survey should take you about 15-25 minutes to complete. Your participation in this research study is **voluntary and anonymous**. Your responses will never be presented in a way that they can be connected to your identity. The results of the survey will be published in summary form in reports, graduate theses, and journal articles. Anonymous survey data will be made available to state fish and wildlife agencies and may be archived online in a publicly accessible format. There are **no known risks** associated with this research; there are **no right or wrong answers** to survey questions; and **you can leave the survey at any time**, for any reason.

For questions about this survey, please contact Emily Sinkular at wildlifeviewingsurvey@vt.edu or (540) 358-0346. This research has been approved by Virginia Tech's IRB committee (Protocol #20-1018). If you have any questions or concerns about this study's conduct or your rights as a research subject, you may contact the Virginia Tech IRB at 540-231-3732 or at irb@vt.edu.

First, we would like to know about your participation in different kinds of wildlife viewing.

In which, if any, of the following forms of **wildlife viewing** have you participated in the past 5 years?

Note: For this survey, "**wildlife**" refers to all animals, such as birds, fish, insects, mammals, amphibians, and reptiles, that are living in natural environments, including in urban and semi-urban places. Wildlife does not include animals living in artificial or captive environments, such as aquariums, zoos, or museums, or domestic animals such as farm animals or pets. "**Wildlife viewing**" refers to intentionally observing, photographing, or feeding wildlife; improving or maintaining wildlife habitat; or visiting parks and natural areas for the primary purpose of wildlife viewing. Wildlife viewing does not include simply noticing wildlife while doing something else, such as gardening, exercising, hunting, or fishing, or intentionally scouting for game.

(Please select all that apply.)

Next, we would like to know about your expenditures related to wildlife viewing.

How much money do you spend on the following expenses related to wildlife viewing in a typical year?

Note: Throughout this survey we will ask you about your activities during "a typical year." This is because we recognize that the last year has been unusual due to the COVID-19 pandemic, and this may have impacted your participation in wildlife viewing. By "a typical year," we mean a recent year (within the last ~5 years) that was not impacted by unusual circumstances like the COVID-19 pandemic. If you started viewing wildlife during the pandemic, please answer all questions about "a typical year" for the past year.

(For each expense category below, please select the response that contains your best estimate of how much you typically spend.)

Trip-related costs for wildlife viewing (such as transportation, lodging, guide fees, or access fees)
